RESEARCH EXPERIENCES

NORC at the University of Chicago

Sept 2022 - Present

- Research assistant to **Prof. Linda Waite** and **Prof. Edward Laumann** on National Social Life, Health, and Aging Project (NSHAP) and Health and Retirement Study (HRS) using R, Python, and Stata
 1. Applied statistical models (Actor-Partner Interdependence Model, Bayesian Profile Regression, Cubic and Penalized Restricted Splines Regression, and Latent Growth Curve Analysis) and computational methods (e.g., machine learning and neural networks) to address sociological research questions in health, aging, and the life course.
 2. Drafted papers and led research assistants in developing independent research projects.

Yale University

May 2022 - Present

- Research assistant to **Prof. Emma Zang** on Panel Study of Income Dynamics (PSID), Health and Retirement Study (HRS), and Midlife in the United States (MIDUS) using Python and Stata
 1. Applied statistical models (Diagonal Reference Model and Varying-intercept Multilevel Regression) and computational data linkages to address sociological research questions in social determinants of health.
 2. Co-drafted and funded by NLCHDD on Grant "Unraveling Geographic Disparities in ADRD Outcomes Across the United States: Exploring the Multifaceted Interplay of Contextual Factors Throughout the Life Course"

UCL Social Research Institute

March 2021 - May 2022

- Research assistant to Prof. Hedvig Horvath and Prof. Bilal Nasim for multilevel causal inference, quantitative text analysis, spatial mapping, and visualization using R
